ABOUT ME

Cybersecurity background in networking and network security, with hands-on exposure to firewalls, proxy, DLP and email security. Always keeping up with the latest vendor technologies and security solutions. Comfortable working with security technologies and explaining them - translating what a customer needs into the right technical solution.

EDUCATION

Bachelor's in Cybersecurity, Petra University — **Oct 2021 - Feb 2026**

WORK EXPERIENCE

Cybersecurity Intern, MayaSoft — **Sep 2025 - Mar 2026**

- Performed network setup, configuration and troubleshooting in a virtual environment.
- Gained hands-on experience with firewall and DLP, along with a technical understanding of proxy, email security and cloud security solutions.
- Supported the Sales team by following the presales cycle closely and helping prepare customer-facing technical material.

PROJECTS

Virtual Firewall Lab — FortiGate-VM — **Sep 2026**

Built a segmented network on FortiGate-VM (FortiOS 7.6.7) over VMware Workstation, separating an internal employee network from an isolated guest network.

- Configured three zones (WAN, Internal, Guest) with DHCP, recursive DNS, static routing, and per-zone administrative access restrictions.
- Wrote firewall policies enforcing NAT-based internet access and full isolation between guest and internal segments, with logging on all denied traffic.
- Applied web filtering with static URL rules and SSL certificate inspection; troubleshot connectivity across ARP, routing, DNS, and host-firewall layers during testing.

FactVerifyAI — Graduation Project — **Oct 2025 - Jan 2026**

- Wrote the project proposal and defined the requirements and scope for an AI-based news verification system.
- Produced the full documentation covering the system's design and functionality.
- Contributed to backend development, including URL content extraction.
- Delivered a demo and presentation to the project supervisor a month before the final discussion.
- Presented the project and explained its technical details to the evaluation committee during the final discussion.

CERTIFICATIONS & TRAINING

- CompTIA Security+ Training
- Fortinet NSE 1, 2 and 3

SKILLS

Technical Skills

- Networking
- Network Security
- Firewall
- Proxy
- Data Loss Prevention (DLP)
- Email Security

Soft Skills

- Communication
- Problem-solving
- Fast learner
- Teamwork
- Adaptability
- Time management
